

**Comtech announce agreement with Nucleus Data to provide wireless management information services**

***~ Comtech offer real-time data capture of beer dispense via the internet within the pub and leisure industry***

BOLTON, LANCASHIRE, 21st May, 2007 – Comtech, ([www.comtechm2m.com](http://www.comtechm2m.com)), a leading Machine-to-Machine (M2M) solution provider and Nucleus Data, ([www.nucleus-data.com](http://www.nucleus-data.com)) the fastest growing company in the beer dispense management information sector, have announced a cooperation agreement to launch Starway™, a state of the art service-based solution for the pub and leisure industry.

Nucleus Data ensures a growing number of tenants, leaseholders and leisure operators are empowered to make better informed and commercially astute decisions. Comtech will provide the “M2M within” the application (end-to-end communication infrastructure) through their  $\mu$ WEAVE platform.  $\mu$ WEAVE comprises an intelligent GPRS gateway for remote sites, web-based back-office management software and specialised M2M services.

Jeff Anspach, managing director of Nucleus Data, said: “Starway™ is a groundbreaking management information tool for the industry. It provides comprehensive and instantaneous data tailored to meet the needs of our customers. We are delighted with the portal developed with Comtech which will revolutionise the capability of pub and leisure operators to increase their profitability.”

Steve Whitehead, marketing director of Comtech Holdings, said: “We focus on creating a communications solution for many different customers across vertical markets allowing our partners to be at the forefront of their sector. I’m sure

Starway™ will prove to be a very successful partnership for both Nucleus Data and ourselves as we enter a fast growing new market place with μWEAVE.”
